

Pass Through P 7044

Pass Through P 7044

This quite flat and wide pass through has been designed for simple cash and document transactions as built-in element for doors and partition walls.

It can also be used as desk-top tray for documents, tickets, etc. The pass-through height for the transfer of documents is 15 mm. The edges of the upper side that are strongly rounded off are the difference to model P 7042.

Security

P 7044 is constructed and produced according to the guidelines of BGV C9 (former UVV-Kassen).

Construction and finish

The flat tray is produced from durable, impact plastic with an extremely abrasion-resistant black structure lacquering (RAL 9005, Jet black).

The bearing plate is from 2,0 mm strong, zinc-coated steel sheet.

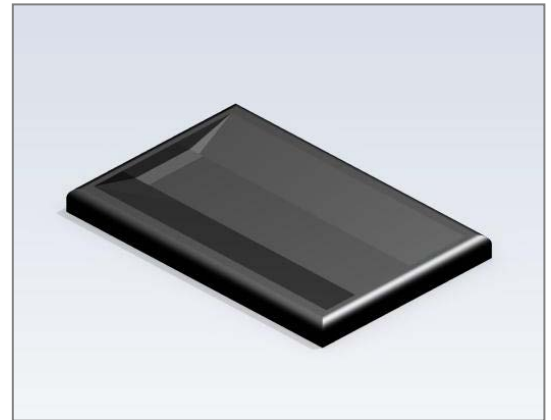

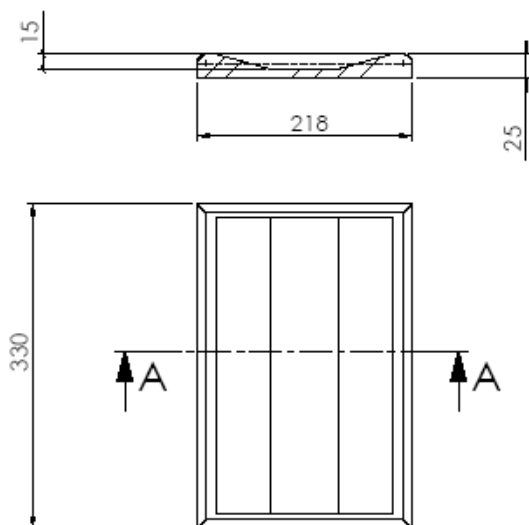

Installation

The bearing plate of the tray is from above bolt-on to the existing frame construction. Afterwards from above the tray is set onto the bearing plate and bolt together from below.

It needs to be guaranteed that in case of any repair or exchange work at a later stage, the unit can be easily dismantled.

Intercommunication System

We recommend our Intercom System Delta to allow customer-friendly communication between operator and customer.

Scope of delivery (Item No.: 100549)

Pass Through P 7044 – execution standard black
